Score for this attempt: 7.5 out of 10

Submitted Sep 20 at 9:58pm

This attempt took 9 minutes.

Question 1

1 / 1 pts

A fellow student named a folder on their site "**imgs**" with the intent to store image files within that folder.

Given the file and folder naming standards of this course, which of the following should be your advice to them.

- ☐ The images folder should be named "assets".
- ☒ The standard folder name for image files is "images".
- ☐ It does not matter what the folder is named, so this folder name is OK.
- ☐ The images folder should be named "pictures".

PartialQuestion 2

0.5 / 1 pts

Which of the following file names meet the file naming standards in this course?

Select any choice below that meets the naming standards.

- ☒ profile-small.png
- ☐ DesignDocument.html
- ☐ Mypicture.jpg
- ☐ march%allocationwith90left#rudder.jpg
- ☐ about us.html
- ☐ contact.html

Question 3

1 / 1 pts

Which of the following applications interprets and renders HTML and CSS code to display content on a graphical user interface?

- ☐ The domain name system
- ☒ A web browser
- ☐ GitHub
- ☐ Visual Studio Code
- ☐ The operating system

Question 4

1 / 1 pts

Which of the following is the HTML element that contains all the elements that will display in the rendered page on the browser?

- ☐ meta
- ☐ head
- ☒ body
- ☐ h1

IncorrectQuestion 5

0 / 1 pts

A student posts a question about why the following snippet of HTML markup is not working as intended and that the text that comes after it is a hyperlink, not just the article title as intended.

The markup is supposed to display a paragraph with a working external link to an article titled "[Jesus Taught Us to Love One Another](https://www.churchofjesuschrist.org/welcome/love-one-another)" on the Church's website.

<p>Please review the following article on Jesus Taught Us to Love One Another. This article will help you understand the ultimate example of love. To follow Him is to love God and serve those around you.</p>

What would be your advice on how to fix this HTML anchor tag markup?

- ☐ The hyperlink attribute is "src" and not "href".
- ☒ You cannot embed an anchor tag <a> within a paragraph <p> element.
- ☐ The closing anchor tag is missing.
- ☐ The hyperlink address is too long

Question 6

1 / 1 pts

Which of the following is an example of an end tag?

- ☐ /div
- ☒ </p>
- ☐ <p>
- ☐ <div>

Question 7

1 / 1 pts

Given the following HTML document, which of the following statements **is true**?

Select all that apply.

```
<html lang="en-US">
  <head>
    <meta charset="utf-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>HTML Foundations</title>
  <body>
    <h1>HTML Foundations</h1>
    <p>The acronym HTML stands for <strong>Hypertext Markup Language</strong>.</p>
  </body>
</html>
```

- ☐ meta elements are missing closing tags </meta>
- ☐ The title element should be a child of the body element.
- ☒ The !doctype declaration is missing at the beginning of the document.
- ☐ The heading element h1 is not allowed to be within the body element.
- ☒ The head element is not closed properly.

Question 8

1 / 1 pts

Match each of the following image file formats to its description.

A good choice for lossy compression of still images and the most popular on the web today.

JPEG (.jpg) ▼

Offers better compression than traditional formats and is a great choice for both images and animated images.

WebP (.webp) ▼

Vector image format and ideal for user interface elements, icons, and diagrams.

SVG (.svg) ▼

Should be avoided for web content due to large file sizes and lack of support.

BMP (.bmp) ▼

Question 9

0 / 1 pts

A student complains that their profile picture is dominating the page and that you have to scroll down and to the right even to see the entire image.

What should be your initial suggestion to them?

- ☐ To use VS Code to resize the image by dragging its corners inward.
- ☐ Use CSS to declare the image width and height.
- ☒ Set the HTML img properties of width and height to whatever dimensions fits the area in which the image is used.
- ☐

Optimize the image in an image editing application by reducing the images dimensions and file size by cropping, resizing (dimensions) and possibly reducing the image quality.
